Evaluation of JPMS Translation, "Selected Economic Translations
on Eastern Europe."

While the subject matter of this translation is not of first interest to this branch the fact that a serial publication of Eastern Europe translations has been initiated is a most interesting development. We work with material from all seven European Satellites and this series should prove to be a good source of information.

However, it is suggested that the following changes in format would reduce the working time required to incorporate the data into our file system.

1. Print the publication on 8 x 10 inch paper, or at least 8 x 10 $\frac{1}{2}$ inches. We now have to make two cuts to trim this copy which is 8 $\frac{1}{2}$ x 11 $\frac{1}{2}$ to get it into our 5 x 8 card file. If it were printed on 8 x 10 inch paper we would only have to make one fold to get it to file size.

2. Place a line across the middle of the page, from left to right, and instruct the printer to place information either above or below the line. This would allow us to make our folds or cuts on an area which does not carry information.
